

Library in our school

Elżbieta Grzelak
teacher librarian

„Library is a place, where we are only limited by our imagination”.

The motto of our work:
"If you want to build a ship, don't drum up
people to collect wood and don't assign
them tasks and work, but rather teach
them to long for the endless immensity of
the sea."

Antoine de Saint Exupery

Librarian's task:

- We place orders for student books and workbooks for all students from 1 to 8 classes,
- We maintain contacts with publishing houses to update orders,
- We register the books in MOLnet+ system (it's a library system to record the book borrows and returns) and hand out the student books to all school pupils,
- We order new books for the library.

Librarian's task:

- One of the most important tasks is the reading promotion task: **HOW DO WE DO IT?**
- First of all, we organise library lessons with special work cards (for example, **the escape room activities** about strong, independent women from Italy, Poland and Pakistan or lessons about **brain secrets** – how to learn to remember more) and **lessons with the elements of bibliotherapy** whose aim is to improve our pupils' self-esteem and well-being. It's a very important topic at the time of pandemic and war at our eastern border.
- **Lessons with kamishibai theater** about change of seasons, ecology, relationship between children and parents, the Legend of the Wawel dragon.

Librarian's task:

- **The promotion of reading: HOW DO WE DO IT? (continuation)**
- **We organise school reading campaigns, such:**
 - The Read-Aloud Day,
 - The International Reading Break,
 - The International School Library Month in October,
 - The National Program for Reading Development – within the program we received the government funds and bought 852 books and school curriculum books. Within the program we organise many events for the reading promotion activities, such as competitions for school pupils to advertise their favourite book, book exhibitions, read-books-aloud actions (older students read aloud to younger pupils).

Librarian's task:

- **We promote the school UNICEF club activities by creating with pupils corridor noticeboards (now we have topic about healthy eating habits).**
- **We organise a school literacy competition for younger pupils entitled "My holiday diary". There are two months of holidays in Poland in July and August. To take part in the competition, pupils should write at least one sentence twice a week in their diary during the time of holiday.**

Thank you for your attention😊
